## Part II Course Details

### 1. Abstract

(A 150-word description about the course)

This course aims to equip students with analytical tools that can be applied to the examination of organizational communication, thereby enabling them to understand the nature of corporate and professional discourse, especially the contextual and cultural constraints operating on communication in these settings. Students will be provided with a variety of discourse analytical frameworks to analyse and understand some of the discursive practices of different professions. Through application of these it is intended that they will develop an understanding of how corporate and professional discourses (both spoken and written) are constructed, interpreted and used in specific settings. In tandem with this they will examine the ways in which members of professional groups and corporations express their identities through their discourses. These objectives will be achieved by introducing students to key concepts and frameworks used in the field of professional and corporate discourse analysis. An understanding of the nature of text construction should serve as a useful tool that can be applied by students when writing in their own workplace contexts.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting* (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	Analyse professional and corporate texts in terms of their purposes and key features, with a view to producing similar texts, applying course-acquired knowledge both for the analysis and production of texts		√	√	√
2.	Account for the ways in which texts are constructed, applying concepts from the course		√	√	
3.	Explain important concepts relating to the construction of texts in workplace settings		√		
		100%			

\* If weighting is assigned to CILOs, they should add up to 100%.

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

### 3. Teaching and Learning Activities (TLAs)
