## **Part II Course Details**

#### **Abstract**

This course aims to give students an understanding of issues related to English language, communication, and culture within a global context. During the course, students engage in theoretical discussions and then apply the theories to observations within a particular Anglophone context. As they observe historical and cultural sites, they also examine how these places are presented and mediated through language. At the end of the course, students critically reflect and evaluate their overall learning experiences, while creatively demonstrating their linguistic, academic and personal achievements. Since this course takes place in a place where English has a significant role, students have considerable opportunities to reflect upon their English communication skills and to become more critically aware of culture and language and their interaction.
